- Primase**  
 See *Nucleotidyltransferase, ribonucleate, DNA replication-priming* [64885-96-7]
- Primate**  
 Studies relating to primates are indexed with the same degree of specificity reported in the original document. For example, the class heading *Primate* is used when the study concerns primates as a group; a heading such as *Monkey* is used when a sub-class of primates is the subject of the study. Studies of precisely identified species are indexed at the common or scientific name of the species
